SUMMARY

Master of Information Technology candidate at UTS (graduating July 2027), specialising in Enterprise Software Development. First place at the ICON x Lyra Hackathon 2026 for an iOS app built on Ray-Ban Meta smart glasses, and an Apple Foundation Program participant building for visionOS. Comfortable across the stack — Swift and SwiftUI on the client, Node.js, Python and PostgreSQL behind it — with hands-on experience integrating LLM and speech APIs.

TECHNICAL SKILLS

Languages: Swift, JavaScript, TypeScript, Python, SQL
Mobile & Spatial: SwiftUI, visionOS, RealityKit, Meta Wearables DAT SDK
Frontend: React, HTML, CSS, Tailwind CSS
Backend: Node.js, Express, REST APIs, OpenAI API (vision, structured output, TTS)
Databases: PostgreSQL
Tools & Platforms: Git, GitHub, Xcode, VS Code, Docker, AWS (coursework), Figma, Jira
AI & Agentic Tools: Cursor, Claude Code, GitHub Copilot, Prompt / Context Design, MCP

PROJECTS

CookPilot — ICON x Lyra Hackathon, 1st Place 2026

Swift, SwiftUI, Meta Wearables DAT SDK, OpenAI (gpt-4.1-nano, tts-1), SFSpeechRecognizer

- Built an iOS app for Ray-Ban Meta smart glasses that identifies ingredients from a fridge photo and ranks recipes the user can cook tonight, filtered against a stored dietary profile so allergens are excluded outright.
- Implemented hands-free cooking: on-device speech recognition for step control with no network round trip, and TTS narration streamed to the glasses.
- Built a debug harness that logged raw speech transcriptions against intended commands, then used the fixed command vocabulary to map observed mis-hearings back to the correct action, making voice control usable across accents.
- Wrote a step scheduler that overlaps passive waiting time and reports the exact minutes saved against cooking the same steps sequentially.

Visual Eyes — Apple Foundation Program 2026

SwiftUI, RealityKit, visionOS, OpenAI Responses API, USDZ

- Built a visionOS app that turns a short questionnaire into a walkable five-room 3D museum, where an AI curator writes the narrative and generates an image for each room.
- Designed a two-stage generation pipeline: structured story generation via strict JSON schema, then parallel image generation composited onto named wall frames in a USDZ gallery.
- Implemented a speech-to-text → LLM → text-to-speech loop so users can talk back to the narrator, with an iPad/iPhone fallback for testing without a headset.

UniHack 2026 — AI Public Speaking Training Game 2026

React, TypeScript, HTML, Tailwind CSS, Claude API

- Built interactive frontend features enabling users to practise public speaking through AI-driven character interactions.
- Collaborated in a cross-functional team of 5 to design, build and demo a fully functional prototype within a 48-hour hackathon.

Wi-Fi-Based Elderly Fall Detection System (In Progress) 2025 – Present

ESP32-S3, Python, PostgreSQL

- Developing the backend architecture and database infrastructure for a Wi-Fi sensing system that detects falls among elderly individuals, as part of a 3-person student team.
- Processing ESP32-S3 sensor data for human presence detection while improving the reliability of fall recognition.

EXPERIENCE

Freelance Web Developer Taiwan

Self-Employed

2024 – Present

- Built and customised 10+ WordPress websites tailored to client branding, content requirements and usability goals.
- Independently developed and deployed chatbot solutions for LINE and WhatsApp to automate client-facing communication workflows.
- Worked directly with clients to gather requirements and deliver projects on schedule.

EDUCATION

University of Technology Sydney (UTS) Sydney, Australia

Master of Information Technology · Specialisation: Enterprise Software Development

Expected July 2027

Griffith University Brisbane, Australia

Bachelor of Film and Screen Media Production

2019 – 2022

LEADERSHIP & ACTIVITIES

UTS Project Society Sydney, Australia

Organising Committee Member

2025 – Present

- Served as the primary point of contact for external speakers across 3 events, managing outreach, scheduling and coordination within a committee of 5.
